

Video wall Floor Stand

Video wall Floor Stand

Sometimes, structural walls aren't capable of supporting video wall displays. In these cases, GPO Display Video Wall Floor Stands are the perfect solution. Floor Stands can be custom-built for specific heights and custom colors, logos and wraps are optional. Locking rear doors may also be added, lending a clean, finished appearance to the video wall structure

Floor Stands (top left) can be used to create video walls of infinite length. Optional locking rear doors (left, center) on floor stand mounts lend a clean, finished appearance to the wall in every angle. Floor Stands can be customized upon request (color, logo, height). In cases where wall mounting is not possible, Floor Stands are the perfect solution. Floor Stands sit on casters but also feature risers for stability and alignment adjustment (bottom left).
