

# WALL CALIBRATOR (AUTOCALI) COLOR CALIBRATOR

Easily facilitate automatic color and brightness calibration across NEX-series video wall arrays.

## Features:

- Compatible with SpyderX Pro color analyzer
- Touch-up video wall systems which are affected by headend equipment/ unique installation circumstances (source device output levels, signal extension, home-running vs. daisy-chaining, etc.)
- Minimizes need for challenging manual adjustments
- Enables seamless integration of new/replacement displays into existing/ aged video wall array
- Supports arrays up to five rows high by five columns high

Note: PC running Wall Calibrator software must be capable of outputting 1920x1080 @60Hz, RGB 4:4:4 Full Color via HDMI.
