

GPO Display’s proprietary H-Mounts provide virtually automatic alignment. H-Mounts’ channel system allows for access to individual displays without having to dismount multiple units. The channel system’s restricted range of motion helps to prevent damage to displays during installation and service. This unique design also ensures long-term alignment and eliminates display “drift”, as there are no moving parts internally. Side covers/trim are included for a clean, finished appearance from any angle.

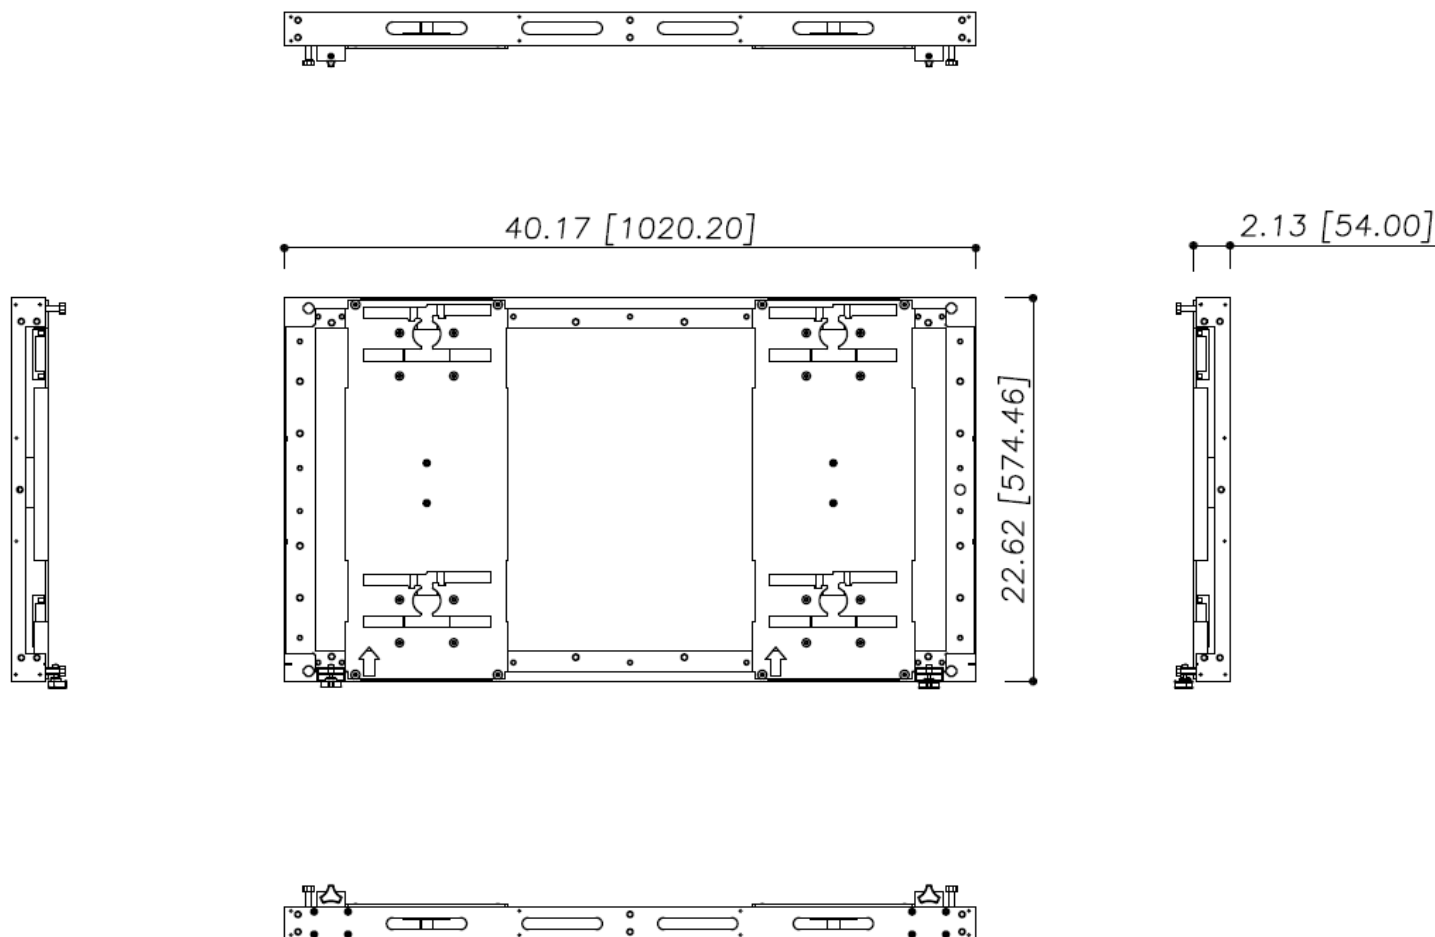

Specification

Model	HLM
