Touch Screen TS-Series Lineup

GPO Display's touch screen commercial monitors feature accurate, responsive 10pt Projected Capacitive (PCAP) touch or 12pt Infrared (IR) touch. With durable, tempered glass, these displays are ideal for high-traffic, public applications. All models are 24/7 rated, TAA-compliant, and secure-ready (no RF/NFC, WiFi, Bluetooth, or embedded computing).

Customized housing is also available for all GPO Display Commercial LCD monitors. Custom colors, logos, and other designs are available, allowing users to match the interior design of a particular room or to match university or corporate colors.
