

This signage player from DT Research features an energy-efficient Intel® Atom™ quad-core processor and Windows® operating system. When combined with WebDT Content Manager and Menu Board Editor software, one SA1366CR is capable of driving content on the screen while communicating with the server for updates for digital menu board and advertising applications. These players also support up to 4K (3840x2160) content, and are the perfect complement to all of our displays.
